MARCH 1ST, 2014

Confirmation of Non-GMO Status Verification

To Whom It May Concern,

The purpose of this letter is to confirm the Non-GMO status of Natural Farm Feed Premium Livestock Feeds. As of March 1st, 2014 all feeds sold by Natural Farm Feed have been manufactured with ingredients tested and verified as Non-GMO. All at-risk ingredients are tested on a per shipment basis, using Romer Labs RUR-HS Bulk Grain Qualitative-Strip Test. This method tests for the presence of the CP4-EPSPS protein, which identifies Monsanto Round-Up Ready Seeds. The accuracy of this test is quoted as being capable of detecting the presence of GMO seeds in a concentration of as little as 1 GMO seed in 600.

Sincerely,

Bob Fischer
